**Ethical considerations in educating children who are deaf or hard of hearing**
*Summary:* The education of deaf or hard of hearing children has become as complex as the varying needs of each individual child. Teachers face classrooms filled with students who are culturally Deaf, hard of hearing, or post-lingually deaf, perhaps using American Sign Language, cochlear implants, hearing aids/FM systems, speech, Signed English, sign-supported speech, contact signing, nonverbal communication, or some combination of methods. Educators who decide what tools are best for these children are making far-reaching ethical decisions in each case. This collection features ten chapters that work as constructive conversations to make the diverse needs of these deaf students the primary focus.

302.2 B275
**Barriers to communication and how to overcome them [DVD]**
*Summary:* A closed door, an exasperated expression, a noisy workstation, a cultural misunderstanding – all of these are examples of “noise,” a general term for anything that gets in the way of effective communication. The key to overcoming communication barriers is to be able to identify and understand them. This program explains the various types of noise and details specific examples of physical, organizational, emotional, nonverbal, cultural, language-related or written barriers. Through expert interviews and creative vignettes, the video offers solutions to overcoming these common communication barriers.

302.22440872 M468
Mayer, Connie; Trezek, Beverly J.
**Early literacy development in deaf children**
*Summary:* There is a robust body of knowledge suggesting that early language and literacy experiences significantly impact future academic achievement. However, relatively little has been written with respect to the early literacy development and experiences of deaf children. The authors address this need by providing an in-depth exploration of how young deaf children learn to read and write, identifying the foundational knowledge, abilities, and skills that are fundamental to this process.

305.230872 A629
Antia, Shirin D.; Kreimeyer, Kathryn H.
**Social competence of deaf and hard-of-hearing children**

Subjects: Deaf children. Social skills.

Summary: The authors present a variety of practical ways to assess the social competence of DHH children. They emphasize the role of assessment in identifying social strengths and needs to establish a basis for any necessary intervention. They then present ways to promote social competence, with a separate focus on strategies appropriate for young DHH children and for school-age DHH children. For both age groups, the authors address the role of families, professionals, schools, and communities in helping children develop the skills needed to become socially competent individuals. This book will be a valuable resource for the parents and families of DHH children, for the general and special educators who teach these children, and for the researchers who describe development and evaluate the effectiveness of strategies to promote the social competence of DHH children.

Foli, Karen J.
Like sound through water: a mother's journey through auditory processing disorder

Summary: The author recounts her personal experiences dealing with a child suffering from auditory processing disorder, describing the misdiagnoses and lack of understanding of the ailment that hampered her struggle to help her son learn to communicate.

362.4 L222
Lambert, Joseph
Annie Sullivan and the trials of Helen Keller [graphic novel]

Summary: Helen Keller lost her ability to see and hear before she turned two years old. But in her lifetime, she learned to ride horseback and dance the foxtrot. She graduated from Radcliffe. She became a world famous speaker and author. She befriended Mark Twain, Charlie Chaplin, and Alexander Graham Bell. Above all, she revolutionized public perception and treatment of the blind and the deaf. The catalyst for this remarkable life's journey was Annie Sullivan, a young woman who was herself visually impaired. Hired as a tutor when Helen was six years old, Annie broke down the barriers between Helen and the wider world, becoming a fiercely devoted friend and lifelong companion in the process. The author examines the powerful bond between teacher and pupil, forged through the intense frustrations and revelations of Helen's early education.

Zeedyk, M. Suzanne (Ed.)
Promoting social interaction for individuals with communicative impairments: making contact

Summary: The contributors explore a wide range of approaches for a variety of impairments, such as autism, profound learning disabilities, deafblindness, severe early neglect and dementia. These approaches include intensive interaction, co-creative communication, sensory integration and music therapy.

**Deaf and hard of hearing**

Summary: In a world where most educational and social systems are designed for people who can hear, being deaf or hard of hearing presents young people with a unique set of challenges. They must find ways to communicate and overcome discrimination. In this book you will read about Denzel, who has never missed being able to hear. He was born deaf, and the idea of "sound" is confusing to him. As you follow Denzel's journey through a world designed for the hearing, you'll see him find ways to overcome the challenges of communicating with others.
Being deaf doesn't have to be a handicap—and it won't keep Denzel from exploring, learning, or accomplishing his dreams.

362.420832 E12

**Early intervention for deaf and hard-of-hearing infants, toddlers and their families: interdisciplinary perspectives**

*Summary:* Featuring a collaborative team of expert contributors across a variety of backgrounds and disciplines, including educators, audiologists, speech-language pathologists, and health care providers, this book presents students and specialists with the fundamental knowledge they need to design and deliver care effectively to this population.

371.911 A396

Algozzine, Bob

**Teaching students with sensory disabilities: a practical guide for every teacher**

*Subjects:* Children with disabilities—Education. Sensory disorders in children.

*Summary:* This book discusses the defining characteristics and specific needs of students who are categorized as deaf, blind, or deaf-and-blind. Offering numerous practical classroom management tips and instruction adjustments, this resource shows teachers how they can provide instruction in a highly effective manner that will foster the independence of students with visual and hearing impairments in the general education classroom. Including a pre-test, post-test, and key vocabulary terms, this guide discusses everything educators need to know about students with sensory disabilities, including: cognitive characteristics and issues, academic characteristics and issues, physical characteristics and issues, behavioural characteristics and issues, and communication characteristics and issues.

371.912 E13
Easterbrooks, Susan R.; Esles, Ellen L.

**Helping deaf and hard of hearing students to use spoken language : a guide for educators and families**

*Summary:* This book provides educators and novice practitioners with the knowledge and skills in spoken language development to meet the needs of students who are deaf or hard of hearing. The authors’ model of auditory, speech, and language development has been used successfully with the deaf and hard of hearing population, in training preservice teachers, and in workshops and presentations for practicing professionals. This resource introduces the authors' developmental model and addresses: creative and scientific ways of interacting with children with hearing loss to develop spoken communication; effective approaches, techniques, and strategies for working with children in the primary grades; and techniques for imparting social and academic information while children are learning to communicate. This reference gives teachers the confidence to provide students with a stimulating environment to foster the natural emergence of spoken language.

371.912 E13
Easterbrooks, Susan R.; Beal-Alvarez, Jennifer

**Literacy instruction for students who are deaf and hard of hearing**

*Subjects:* Deaf—Education. Hearing impaired children—Education. Literacy. Reading.

*Summary:* In this concise guidebook, the authors present the role of assessment in the literacy process, an overview of evidence-based practices, and in the absence of such information, those practices supported by causal factors across the National Reading Panel's five areas of literacy. They also review the evidence base related to writing instruction, present case studies that reflect the diversity within the DHH population, and review the challenges yet to be addressed in deaf education.

371.912 K51
Kincaid, Patricia

**Literacy practices of teachers of the deaf/hard-of-hearing : exploring the experience of itinerant teachers supporting students who are deaf/hard-of-hearing develop literacy skills**

*Summary:* Deaf and Hard-of-Hearing (DHH) is a communication exceptionality which requires visual support of audio produced information. Historically, DHH children encounter more literacy difficulties than their peers with normal hearing. The connection between literacy skills and academic retention is well documented. Research has found DHH high school graduates have reading abilities that are comparable to non-impaired hearing Grade 4 students. This finding may lead to the incorrect conclusion that DHH students cannot develop reading skills similar to their hearing peers. Also, given the various causes and types of hearing loss, teachers can expect to be instructing at least one student who is DHH in their classroom. Overall, participant
interviews revealed barriers to inclusive classroom practices. Future studies may wish to examine both pre-service and teachers’ beliefs toward inclusive practice.

Educating deaf students: from research to practice

371.912 O48
Oliva, Gina A.; Lytle, Linda Risser
Turning the tide: making life better for deaf and hard of hearing school children
Summary: This book presents a qualitative study of deaf and hard of hearing students who attended mainstream schools. The authors conducted three focus groups in different regions in the country, enlisting six to eight participants with diverse backgrounds for each session. They also gathered information from 113 online respondents who answered the same questions used in the focus groups. The respondents discussed many issues, including the difficulties of finding friends and social access, the struggle to establish an identity, the challenges of K-12 interpreting and class placement, and the vast potential of summer and weekend programs for deaf students.

371.912 P965
Promoting language and literacy in children who are deaf or hard of hearing
Subjects: Deaf children—Education. Hearing impaired children—Education.
Summary: This comprehensive textbook-and-DVD set brings the answers to life for tomorrow's speech-language pathologists, audiologists, and educators. The newest addition to the respected Communication and Language Intervention (CLI) series, this important volume enlisted more than a dozen experts to present evidence-based intervention approaches, spanning the critical
early years of language development through the complex reading and writing challenges of the school years.

371.912 S745
Spencer, Patricia Elizabeth; Marschak, Marc
**Evidence-based practice in educating deaf and hard-of-hearing students**
*Subjects*: Deaf children—Education. Hearing impaired children—Education.
*Summary*: In this critical evaluation of what we know and what we do not know about educating deaf and hard-of-hearing students, the authors examine a wide range of educational settings and research methods that have guided deaf education in recent years, or should. The book provides a focus for future educational and research efforts, and aims to promote optimal support for deaf and hard-of-hearing learners of all ages. Co-authored by two of the most respected leaders in the field, this book summarizes and evaluates research findings across multiple disciplines pertaining to the raising and educating of deaf children, providing a comprehensive but concise record of the successes, failures, and unanswered questions in deaf education.

Luft, Pamela
**Promoting positive transition outcomes : effective planning for deaf and hard of hearing young adults**
*Subjects*: Deaf students—Services for. Educational counseling. Hearing impaired students—Services for. Vocational guidance.
*Summary*: Many students struggle with the transition from high school to the next stage of their lives. For deaf and hard of hearing (DHH) students, that struggle can be intensified by barriers and discriminatory attitudes they face in their communities, schools, and workplaces. Though much progress has been made, they are often underemployed and underpaid, and they receive postsecondary training at lower rates than other disability groups. The author explores the reasons for these statistics and offers strategies and resources that can improve outcomes.

The central auditory processing kit [kit]

418.0078 I37
Inclusive language education and digital technology
Subjects: Children with disabilities—Education. Language and languages—Computer-assisted instruction. Language and languages—Study and teaching—Technological innovations.
Summary: This volume brings together chapters that collectively address issues relating to inclusive language education and technology. Topics include language teaching to the Deaf, Hard of Hearing and students with dyslexia, benefits of multimodal approaches for language learning, examples of software use in the language classroom, and copyright matters. The book demonstrates not only a commitment to inclusive practices but suggests practical ideas and strategies for practising and aspiring language teachers and those in support roles. The book also provides case studies and relates the issues to theoretical and policy frameworks. In drawing on different European perspectives, the book aims to promote discussion and collaboration within an international community of practice, especially about the role of technology in widening and strengthening opportunities for teachers and pupils alike and ensuring more effective Modern Foreign Language teaching, learning and assessment for all learners.

Flora, Sherrill B.
Sign language fun in the early childhood classroom: enrich language and literacy skills of young hearing children, children with special needs, and English language learners
Summary: This is an educational resource designed for all early childhood classrooms and designed to be used by all teachers, care providers, and parents of all young children: hearing, hearing-impaired, deaf, children with special needs, gifted children, children with communication disorders, and children who are new to our country and just learning to speak English. Teachers and parents do not need any previous knowledge or experience with American Sign Language (ASL) to use this book successfully. This book contains easy-to-use thematic
units, complete with teaching suggestions, games, activities, songs, rhymes, recommended children's literature, and reproducible illustrated sign language cards to get you started learning and teaching ASL to your young learners. Some of the themes included are: feelings/emotions, colours, pets, farm animals, people, family, weather, toys, etc.

**The source for children with cochlear implants**
*Summary*: Birth to adolescence.

649.1512 M363
Marschak, Marc
**Raising and educating a deaf child: a comprehensive guide to the choices, controversies, and decisions faced by parents and educators**
*Summary*: This book offers a comprehensive summary of everything a parent or teacher would want to know about raising and educating a deaf child. It covers topics ranging from what it means to be deaf to the many ways that the environments of home and school can influence a deaf child's chances for success in academic and social circles.

649.1512 M449
Mauldin, Laura
**Made to hear: cochlear implants and raising deaf children**
*Summary*: A mother whose child has had a cochlear implant tells Laura Mauldin why enrollment in the sign language program at her daughter's school is plummeting: "The majority of parents..."
want their kids to talk." Some parents, however, feel very differently, because "curing" deafness with cochlear implants is uncertain, difficult, and freighted with judgment about what is normal, acceptable, and right. This book sensitively and thoroughly considers the structure and culture of the systems we have built to make deaf children hear. Based on accounts of and interviews with families who adopt the cochlear implant for their deaf children, this book describes the experiences of parents as they navigate the health care system, their interactions with the professionals who work with them, and the influence of neuroscience on the process.

Churnin, Nancy
The William Hoy story: how a deaf baseball player changed the game
Subjects: Baseball players—United States—Biography—Juvenile literature. Deaf athletes—United States—Biography—Juvenile literature. Hoy, William,—1862-1961—Juvenile literature. Summary: All William Ellsworth Hoy wanted to do was play baseball. After losing out on a spot on the local deaf team, William practiced even harder, eventually earning a position on a professional team. But his struggle was far from over. In addition to the prejudice Hoy faced, he could not hear the umpires' calls. One day he asked the umpire to use hand signals: strike, ball, out. That day he not only got on base, but also changed the way the game was played forever. William "Dummy" Hoy became one of the greatest and most beloved players of his time.

812.54 G449
The miracle worker [DVD]
Subjects: Keller, Helen,—1880-1968. Sullivan, Annie,—1866-1936. Summary: Blind, deaf, and mute since she was a toddler, Helen Keller is a spoiled uncontrollable seven-year-old whose frequent outbursts dominate the Keller household. Teacher Annie Sullivan employs patience, perseverance, and the power of words to free Helen from her dark and silent world.

813.6 S451
Seeger, Pete; Jacobs, Paul DuBois
The deaf musicians
Subjects: Deaf—Juvenile fiction. Jazz—Juvenile fiction. Musicians—Juvenile fiction. People with disabilities—Juvenile fiction. Summary: Lee, a jazz pianist, has to leave his band when he begins to lose his hearing, but he meets a deaf saxophone player in a sign language class and together they form a snazzy new band.
