Coding and the arts : connecting CS to drawing, music, animation and more

Portland, OR : International Society for Technology in Education, 2021.

Summary: CS sometimes gets a bad rap as dry, isolated and uninteresting work—the pursuit of analytically minded techies working alone. In reality, programming is deeply creative and enables artists of all types to discover new ways to express themselves. In this book, you'll explore how to apply computation to stretch the possibilities in many art forms, as well as how to pave the way for entirely new ones. By approaching programming tools as artistic media, you'll connect the dots between programming, creativity and artistic expression. Along the way, you'll learn from a diverse set of computational artists and teachers who are using technology to push the bounds of traditional artistic media.

The mind-body cure : heal your pain, anxiety, and fatigue by controlling chronic stress

Vancouver, BC : Greystone Books, 2020.

Summary: Most people today are familiar with chronic stress—whether it's family or work pressures, the anxiety we experience each day never seems to end. It may even feel like we're always in fight-or-flight mode. As the author explains, the continuous and excessive release of stress hormones in our bodies are behind 75 percent of visits to a doctor's office. What if we could manage our stress and its harmful side effects with easy and affordable tools? The original REFRAME Toolkit offers 7 simple ways to reduce chronic stress, including making specific changes to your diet, sleep, exercise habits, and more tools including meditation and mindfulness techniques. Interweaving evidence-based science with practical advice to calm your mind, this

book helps you move from primitive fight-or-flight mode to send healing hormones into your body instead.

Reading and writing strategies for the secondary social studies classroom in a PLC at work

Bloomington, IN : Solution Tree Press, 2021.

Summary: Large literacy gaps in the secondary grades require that all content-area teachers find ways to support students' literacy learning to ensure their success in academics and beyond. Part of the *Every Teacher is a Literacy Teacher* series edited by Mark Onuscheck and Jeanne Spiller, this book highlights how collaborative teams can work together to integrate literacy and content-area instruction. The authors provide practical literacy-based strategies that grades 6-12 social studies teachers can use to connect the disciplinary content they teach in their classrooms with the development of essential literacy skills students need when reading and writing in social studies. By reading this book, middle and high school social studies teachers will gain the tools and techniques needed to simultaneously support literacy development and social studies learning.

Calling my spirit back

Place of publication: Tellwell Talent, 2020.

Summary: Indigenous Peoples have always carried the knowledge necessary to heal. When our people heal, our families heal, our communities heal, and our land will heal. You cannot have one without the other. These stories are teachings, prophecy and protocols shared throughout the years by elders, language speakers, medicine people and helpers. They have been the foundation to individual healing and learning self-love. The author is Syilx and Secwepemc, and although many of this book's teachings come from these places, they also intertwine with Indigenous knowledge shared through ceremony from many other nations. These teachings not only show us how to love and respect ourselves, but they provide protocols and laws on how we are to plan for ourselves, our community and our economy, and they show us how to govern our people through matriarchal and egalitarian teachings. People from all backgrounds have embraced concepts from other parts of the world that promote self-love, healing and well-being through practices of discipline and meditation, yet very little has been shared about Indigenous systems and their approach to healing.

A people and a nation : new directions in contemporary Métis studies

Vancouver, BC : UBC Press, 2021.

Summary: The field of Métis Studies has been afflicted by a longstanding tendency to situate Métis within deeply racialized contexts, and/or by an overwhelming focus on the nineteenth century. This book ranges across identity, history, politics, literature, spirituality, religion, and kinship networks to reorient the conversation toward Métis experiences today. It also dismantles the narrow notions that continue to shape understandings of Métis existence to convincingly demonstrate a more robust approach to Métis studies centered on Métis peoplehood and nationhood.

The little book of investing like the pros : 5 steps for picking stocks

Hoboken, NJ : John Wiley & Sons, Inc., 2020.

Summary: Stock investing is more prevalent than ever, whether directly or indirectly through brokerage accounts, exchange-traded funds, mutual funds, or retirement plans. Despite this, the vast majority of individual investors have no training on how to pick stocks. And, until now, there hasn't been a truly accessible, easy-to-understand resource available to help them. This book was written to fill this void. We believe the simplicity and accessibility of our stock picking framework is truly unique. Using real-world examples and actual Wall Street models used by the pros, we teach you how to pick stocks in a highly accessible, step-by-step manner. Our goal is straightforward—to impart the skills necessary for finding high-quality stocks while protecting your portfolio with risk management best practices.

Indigenous-industry agreements, natural resources and the law

New York, NY : Routledge, 2021.

Summary: This edited collection is an interdisciplinary and international collaborative book that critically investigates the growing phenomenon of Indigenous-industry agreements – agreements that are formed between Indigenous Peoples and companies involved in the extractive natural resource industry. This groundbreaking collection is situated within frameworks that critically analyze and navigate relationships between Indigenous Peoples and the extraction of natural resources. These relationships generate important questions in the context of Indigenous-industry agreements in diverse resource-rich countries including Australia and Canada, and regions such as Africa and Latin America. Beyond domestic legal and political contexts, the collection also interprets, navigates, and deploys international instruments such as the United Nations Declaration on the Rights of Indigenous Peoples to fully comprehend the diverse expressions of Indigenous-industry agreements.

Our future : how kids are taking action

Toronto, ON : Second Story Press, 2019.

Summary: Young people from across the globe are raising awareness about what issues matter to them most and are working to protect the future that we all share. American Jaelun Parkerson kneels with his football teammates during the national anthem to protest racial injustice.

Canadian Autumn Peltier spoke in front of the United Nations to raise awareness about water pollution. Melati Wijsen from Indonesia started working at twelve-years-old to convince her government to ban plastic bags. And Tiassa Mutunkei from Kenya started a club for young people to stop elephants from being killed for their ivory tusks. This book shines a light on the efforts on ten brilliant and brave young activists who are making a difference for the future of our planet. The book's final pages give ideas for how young people can try and make a difference in their own lives and communities.

We can do better : urgent innovations to improve mental health access and care

New York, NY : Simon & Schuster, 2021.

Summary: A leading psychiatrist and mental health expert reveals important issues in mental health care today and introduces innovations to revolutionize and improve mental health for everyone. Mental health care systems are failing to deliver proven treatments in a timely manner, and the consequences, for individuals and societies, are dire. In this urgent book, the author outlines proven innovations in medicine and health care delivery that we could benefit from today—if we only had the will to share, use, and fund these brilliant tools. Using fictional—but all too real—examples of people suffering from various mental illnesses, from depression to opioid addiction, and drawn from his real-life experiences in this field, the author reveals the barriers to care and other faults in mental health care systems. He then shows the simple, yet startlingly effective innovations we never knew existed that can help people now.

Handbook of critical race theory in education

New York, NY : Routledge, 2013.

Summary: This handbook illustrates how education scholars employ Critical Race Theory (CRT) as a framework to bring attention to issues of race and racism in education. It is the first authoritative reference work to provide a truly comprehensive description and analysis of the topic, from the defining conceptual principles of CRT in the Law that gave shape to its radical underpinnings to the political and social implications of the field today. It is divided into three sections, covering innovations in educational research, policy and practice in both schools and in higher education, and the increasing interdisciplinary nature of critical race research. With 28 newly commissioned pieces written by the most renowned scholars in the field, this handbook provides the definitive statement on the state of critical race theory in education and on its possibilities for the future.

Why they hate us : how racist rhetoric impacts education

New York, NY : Teachers College Press, 2021.

Summary: This book examines how racist political rhetoric has created damaging and dangerous conditions for Students of Color in schools and higher education institutions throughout the United States. The authors show how the election of the 45th president has resulted in a defining moment in U.S. history where racist discourses, reinforced by ideologies of white supremacy, have affected the educational experiences of our most vulnerable students. This volume situates the rhetoric of the Trump presidency within a broader historical narrative and provides recommendations for those who seek to advocate for anti-racism and social justice. As we enter the uncharted waters of a global pandemic and national racial reckoning, this will be invaluable reading for scholars, educators, and administrators who want to be part of the solution.

Lessons from lockdown : the educational legacy of COVID-19

Abingdon, Oxon, UK : Routledge, 2021.

Summary: This book explores the impact of COVID-19 on our schooling systems, on the young people and families that they serve, and on all who work in our schools, and asks what the long-term ramifications might be for the pedagogy and purpose of formal education. Drawing on the voices of over one hundred pupils, parents and professionals, it reveals how teachers, learners and schools are adapting their practice in areas such as curriculum modelling, parental engagement, assessment, home learning, and on-line and blended learning. In this timely new book, the author draws on his experience as a teacher, researcher, examiner, school governor and policy influencer to assess what the educational legacy of COVID-19 could be, and the potential that it offers for reframing how we 'do' schooling. He argues that there is much to learn from this tumultuous period and that, post-lockdown, we ought to take advantage of the opportunity it has offered to produce a more personalised, family-friendly and inclusive approach to schooling, and to learning more broadly.

The day I reached my tipping point : compassion fatigue and educators

Victoria, BC : Friesen Press, 2019.

Summary: Teachers are found in every geographical region of the world. What they don't realize, is that through policies, procedures, technology upgrades, parental and administrative as well as government expectations, their psychological well-being is slowly being depleted. The erosion of their compassion and empathy over time leads to anxiety, stress, depression, and burnout which are the themes of this book. This depletion can result in qualified, skilled individuals leaving the profession early; others, to seek different career opportunities, or stay in the system just "going with the flow"; potentially eroding their personal values, belief system and principles. The key outcomes from this book are understanding what compassion fatigue (CF) or Occupational Stress Injury (OSI) is and how it can impact an educator.

Teach up! : empowering educators through relationships, rigor, and relevance

Rexford, NY: International Center for Leadership in Education, 2021.

Summary: This book shows the power of positive teacher-student relationships and high academic expectations to help ALL students reach their full potential. “Teaching up” is about adopting a growth-based mindset and iterative practice to cultivate meaningful learning opportunities—the ones that set kids up for success beyond school, as talented and confident human beings. Building on the ICLE Relationships, Rigor, and Relevance model, the author provides educators with strategies proven to help ALL students excel at rigorous tasks while staying engaged in the classroom. To support these strategies, this book examines the importance of social and emotional learning (SEL), the impact of childhood trauma, and the influence of classroom environment. The book then shifts to presenting step-by-step practices for building relationships and increasing the level of rigor and relevance in instructional tasks that may be applied in any classroom, regardless of subject matter or grade level.

The school leadership survival guide : what to do when things go wrong, how to learn from mistakes, and why you should prepare for the worst

Charlotte, NC : Information Age Publishing, Inc., 2021.

Summary: This book is intended as an uncommon guide for school leaders and a resource they can turn to when confronted with issues they might not normally face in typical practice. The book serves as a bridge between research and day-to-day school leadership, and is intended to help leaders and school communities improve in areas they routinely avoid. In this sense, the book is meant as a "go to" resource for principals, those who train and teach them, and scholars. Although authors recognize the complexity of issues raised in the book, each chapter has a "How to," "What to do," or "Why You Should" ethos to give the book a unifying structure and help provide a practical translation of research and theory into practice.

Principal leadership for racial equity : a field guide for developing race consciousness

Thousand Oaks, CA : Corwin, 2021.

Summary: Leading for equity requires the ability to look beyond surface-level, technical fixes and meet ever-more demanding adaptive challenges. While all stakeholders must own a common vision of systemic equity, building-level leaders play an especially critical role in realizing such a vision. And, at this particular point in our history, the need for principals to cultivate the will and skill to educate all children in safe and affirming environments has become more acute than ever.

Going gradeless, grades 6-12 : shifting the focus to student learning

Thousand Oaks, CA : Corwin, 2021.

Summary: In this book, the authors share their districts' successes moving to alternate assessment methods that promote learning rather than solely achievement. The proponents of grade reform highlight the arbitrary nature of grades, the undue stress experienced by some learners, and the potential interference in the process of learning. On the other hand, opponents reference the lack of accountability and a shift away from content knowledge that is perceived in many alternate assessment models. This book outlines how to remove the negative impacts of grades while still maintaining a high level of accountability. While the majority of other books in this space provide a rationale for why the shift is necessary, these authors provide the classroom teacher's perspective and concrete examples of how these approaches can be developed and applied. They provide sample assessments, student work samples, an accountability checklist, a sample of their rubrics, and a review of our collected data.

The quick guide to simultaneous, hybrid, and blended learning

Thousand Oaks, CA : Corwin, 2021.

Summary: What a year! Twelve months and counting since COVID expanded, stretched, and blurred the boundaries of teaching and learning, at least one thing has remained constant: our commitment as educators to move learning forward. It's just the context that keeps changing—why the authors have created a follow-up to *The Distance Learning Playbook*. First, to be clear: simultaneous learning must not be an additive, meaning we combine two entirely different approaches and double our workload. That's unsustainable. Instead, we must extract, integrate, and implement what works best from both distance learning and face-to-face learning environments. Then and only then—the authors insist—can we maximize the learning opportunities for all our students.

Adventures in authentic learning : 21 step-by-step projects from an Edtech coach

Portland, OR : International Society for Technology in Education, 2020.

Summary: This insider's guide from a seasoned technology coach provides classroom teachers with ideas and strategies to help students develop real-world projects to support authentic learning. Not every teacher has a dedicated coach who can support them in the classroom. Even those who do can benefit from additional ideas and support from a seasoned coach. Written by an experienced instructional technologist, this book is designed to help fill this role, showing teachers how to empower students to take charge of their own learning and provide creative and authentic opportunities for students to demonstrate their knowledge through projects. With this

book, teachers will get the guidance they need to help students engage in learning experiences that allow them to reflect on their level of knowledge and what they need to learn, while exploring topics that correspond with their interests. Instead of providing text-based slideshow presentations that students read off a screen, teachers will learn to guide students in creating tutorial videos, providing peer reviews, curating their own resources and participating in debates.

Improving schools with blended learning : how to make technology work in the modern classroom

Abingdon, Oxon, UK : Routledge, 2021.

Summary: This book is specifically designed to address the important issues needed to successfully modernise education within the context of technological change. It does this by first providing a clear roadmap for designing Blended Learning environments able to respond to the technological imperatives challenging schools at present, and then illustrating this roadmap via specific, original research that details the 'how to' aspects of a successful technology-based design process. School leaders, teachers, teacher education students and researchers will all find highly relevant information about how to manage for disruption in the new and informative approach to Blended Learning (BL) they will discover in this book.

Hatching tier two and three interventions in your elementary school counseling program

Thousand Oaks, CA : Corwin, 2020.

Summary: This book provides elementary school counselors with a hands-on guide to creating and implementing high-quality school counseling systems of support. Building on the content from *The Use of Data in School Counseling* and aligning with the content in *Hatching Results for Elementary School Counseling: Implementing Core Curriculum and Other Tier One Activities*, this new text will focus on Tier 2 and Tier 3 activities at the elementary level within a multi-tiered, multi-domain systems of supports (MTMDSS). Tier 2 systems of support focus on implementing targeted, data-driven interventions (small group counseling/instruction, referral to interventions on campus, etc.) and are designed for students who are identified by pre-scheduled and pre-determined data screening elements. These include attendance, behavior, work skills, and study habits (report card marks) and/or equity and access issues. Tier 2 includes short-term progress monitoring and collaboration among teachers, parents/guardians and the school counselor until improvement and/or referral to appropriate services can be found and implemented. Tier 2 activities are designed for students who are struggling to achieve academic success and/or are identified as deserving of instruction and/or supports in addition to Tier 1 curriculum activities (foster youth, dual language learners, etc.).

Lessons in love and understanding : relationships, sexuality and gender in the classroom

Thousand Oaks, CA : Corwin, 2020.

Summary: Sex and gender are delicate and nuanced issues for all of us and can be intimidating topics to teach. This practical, empathetic book aims to dispel some of the uncertainties that many teachers have and empower them to lead inclusive, age-appropriate lessons in primary and secondary schools. Taking an approach that celebrates the individual identity of all learners, and underpinned by an awareness of the complexity of language around these topics, this book offers a careful evaluation of the 2020 Relationship and Sex Education policy for schools in England, and how schools can offer intelligent, socially responsible, sex education that goes beyond simply meeting statutory requirements.

Playing with language : improving elementary reading through metalinguistic awareness

New York, NY : Teachers College Press, 2021.

Summary: All students can benefit from a deeper understanding of how our language works. This book shows elementary school educators (K–6) how to think about, talk about, and manipulate language out of context. This cognitive skill set, known as metalinguistic awareness, is an important component of reading ability. This practical guide scales activities and teaching suggestions to students' age, linguistic background, and individual strengths and challenges. The authors offer suggestions for introducing metalinguistic concepts like phonological, semantic, and syntactic awareness with fun activities like games, songs, rhymes, and riddles. The book also identifies and explains research that supports using metalinguistic teaching with diverse students and English learners to build skills in multiple areas, including reading comprehension and decoding ability. Teachers will find that students introduced to language play become continually engaged with language, finding real-world examples with wonder and delight.

Restorative literacies : creating a community of care in schools

New York, NY : Teachers College Press, 2021.

Summary: Through eight compelling stories of restorative literacies, the author explores the complex relationships among cognition, metacognition, identity, behavior in schools, and literacies. Based on the principles of restorative justice, restorative literacies are designed to help educators repair harm, restore relationships, and expand the concept of literacy for some of our most disenfranchised and disengaged students. Restorative literacies are not just about growing readers and writers per se. They are about creating a community of care that involves students, teachers, administrators, and families so that all students experience racially, culturally, linguistically, and economically responsive instruction in multiple forms of literacies. Drawing on the author's experiences cultivating a love of reading among her students and studying the practices of other educators, this book advances a provocative set of examples about centering the voice and stories of people in our quest to humanize and reimagine how we care for, about, and with others.

Street data : a next-generation model for equity, pedagogy, and school transformation

Thousand Oaks, CA : Corwin, 2021.

Summary: In a 2011 summary written for the Centre for Strategic Education, Michael Fullan identified four "wrong drivers" in education policy responsible for stifling successful, effective reforms. These wrong drivers are meant to accomplish improved outcomes for students and

teachers, but have little chance of meeting their stated goals without a foundational set of "right drivers" oriented toward measurable, whole-system changes; specifically, changes that build capacity, promote group solutions, focus on instruction, and employ integrated or systemic strategies. Reliance on wrong drivers for equity have resulted in pressures to embrace standards, raise test scores, and purchase off-the-shelf programs that treat inequitable conditions as formulaic. None of these provide educators with the tools they need to engage in hard conversations about racism, cultural hegemony, and achievement disparities.

Ancient pathways, ancestral knowledge. Volume 1, The history and practice of Indigenous plant knowledge : ethnobotany and ecological wisdom of Indigenous Peoples of northwestern North America

Montréal, QC : McGill-Queen's University Press, 2014.

Summary: In this book, the author integrates her research into a two-volume ethnobotanical tour-de-force. Drawing on information shared by Indigenous botanical experts and collaborators, the ethnographic and historical record, and from linguistics, palaeobotany, archaeology, phytogeography, and other fields, she weaves together a complex understanding of the traditions of use and management of plant resources in this vast region. She follows Indigenous inhabitants over time and through space, showing how they actively participated in their environments, managed and cultivated valued plant resources, and maintained key habitats that supported their dynamic cultures for thousands of years, as well as how knowledge was passed on from generation to generation and from one community to another. Volume 1 presents a historical overview of ethnobotanical knowledge in the region before and after European contact, and ways in which Indigenous Peoples used and interacted with plants – for nutrition, technologies, and medicine. Drawing connections between similarities across languages, Turner compares the names of over 250 plant species in more than fifty Indigenous languages and dialects to demonstrate the prominence of certain plants. She also examines the effects that introduced species and colonialism had on the region's Indigenous Peoples and their ecologies.

Ancient pathways, ancestral knowledge. Volume 2, The place and meaning of plants in Indigenous cultures and worldviews : ethnobotany and ecological wisdom of Indigenous peoples of northwestern North America

Montréal, QC : McGill-Queen's University Press, 2014.

Summary: In this book, the author integrates her research into a two-volume ethnobotanical tour-de-force. Drawing on information shared by Indigenous botanical experts and collaborators, the ethnographic and historical record, and from linguistics, palaeobotany, archaeology, phytogeography, and other fields, she weaves together a complex understanding of the traditions of use and management of plant resources in this vast region. She follows Indigenous inhabitants over time and through space, showing how they actively participated in their environments, managed and cultivated valued plant resources, and maintained key habitats that supported their dynamic cultures for thousands of years, as well as how knowledge was passed on from generation to generation and from one community to another. Volume 2 provides a sweeping account of how Indigenous organizational systems developed to facilitate the harvesting, use, and cultivation of plants, to establish economic connections across linguistic and cultural borders, and to preserve and manage resources and habitats. Turner describes the worldviews and philosophies that emerged from the interactions between peoples and plants, and how these understandings are expressed through cultures' stories and narratives. Finally, she explores the ways in which botanical and ecological knowledge can be and are being maintained as living, adaptive systems that promote healthy cultures, environments, and indigenous plant populations.

The well-gardened mind : the restorative power of nature

New York, NY : Scribner, 2020.

Summary: The garden is often seen as a refuge, a place to forget worldly cares, removed from the "real" life that lies outside. But when we get our hands in the earth we connect with the cycle of life in nature through which destruction and decay are followed by regrowth and renewal. Gardening is one of the quintessential nurturing activities and yet we understand so little about it. This book provides a new perspective on the power of gardening to change people's lives. The

author investigates the many ways in which mind and garden can interact and explores how the process of tending a plot can be a way of sustaining an innermost self.

GPS : good parenting strategies : the no-guilt survival guide for parenting during the pandemic and beyond

Thousand Oaks, CA : Corwin, 2021.

Summary: Students' ability to learn is as much affected by their internal and external environments as it is by their academic skills. In a classroom environment, teachers can employ practices to manage students' day-to-day behavior. But many parents and caregivers find behavior management challenging while adjusting to virtual or at-home education. This can be especially difficult as many children deal with emotional challenges, such as increased anxiety or stress as a result of the COVID-19 pandemic. Parents and caregivers of children with special needs may also face unique challenges during this time. This book is specifically designed for parents who are, have been, or will be knee-deep in serious behavior problems ranging from lack of motivation to aggressive and/or emotional outbursts.

Strategic planning : Process, templates and effective implementation

Place of publication : ER Technical Inc., 2019.

Summary: After years of study, field research and dozens of client engagements, the author finally arrived at a refined and careful method. This book argues planners must follow a structured method that takes into account not only the different types and purposes of planning (a distinction rarely made) but also the principles of effective program implementation. These success factors are proven in studies, but do not seem to be part of management training. And yet strategic planning, properly done and executed, can transform the culture and propel the organization to success.

This was our pact [graphic novel]

New York, NY : First Second, 2019.

Summary: It's the night of the annual Autumn Equinox Festival, when the town gathers to float paper lanterns down the river. Legend has it that after drifting out of sight, they'll soar off to the Milky Way and turn into brilliant stars, but could that actually be true? This year, Ben and his classmates are determined to find out where those lanterns really go, and to ensure success in their mission, they've made a pact with two simple rules: No one turns for home. No one looks back. The plan is to follow the river on their bikes for as long as it takes to learn the truth, but it isn't long before the pact is broken by all except for Ben, and (much to Ben's disappointment) Nathaniel, the one kid who just doesn't seem to fit in. Together, Nathaniel and Ben will travel farther than anyone has ever gone, down a winding road full of magic, wonder, and unexpected friendship.

Mamie on the mound : a woman in baseball's Negro leagues

North Mankato, MN : Capstone Editions, 2020.

Summary: Mamie "Peanut" Johnson had one dream: to play professional baseball. She was a talented player, but she wasn't welcome on the all-white Girls Pro Baseball League team due to the color of her skin. However, a greater opportunity came her way in 1953 when Johnson signed to play ball with the Negro Leagues' Indianapolis Clowns, becoming the only professional female pitcher to play on a men's team. During the three years she played with the team, her record was an impressive 33-8. But more importantly, she broke ground for female pitchers like Mo'ne Davis and women everywhere.

Reynolds, Nancy Thalia

Mixed heritage in young adult literature

Lanham, MD : Scarecrow Press, 2009.

Summary: This is the first in-depth, broad-scope critical exploration of this subgenre of multicultural literature. Following an introduction to the topic, the author examines the portrayal of mixed-heritage characters in literary classics by James Fenimore Cooper, Mark Twain, and Zora Neale Hurston—staples of today's high school English curriculum—along with other important authors. It opens up the discussion of young-adult racial and ethnic identity in literature to recognize—and focus on—those whose heritage straddles boundaries. In this book teachers will find new tools to approach race, ethnicity, and family heritage in literature and in the classroom. This book also helps librarians find new criteria with which to evaluate young adult fiction and nonfiction with mixed-heritage characters.

Proulx-Turner, Sharron.

She walks for days inside a thousand eyes : a two-spirit story

Winnipeg, MB : Turnstone Press, 2008.

Summary: In this collection, the author combines poetry and history to delve into the little-known lives of two-spirit women. Regarded with both wonder and fear when first encountered by the West, First Nations women living with masculine and feminine principles in the same body had important roles to play in society, as healers and visionaries, before they were suppressed during the colonial invasion. This collection creatively juxtaposes first-person narratives and traditional stories with the voices of contemporary two-spirit women, voices taken from nature, and the teachings of Water, Air, Fire and Mother Earth. The author restores the reputation of two-spirit women that had been long under attack from Western culture as she re-appropriates the lives of these individuals from the writings of Western anthropologists and missionaries.

The sun will come out

Victoria, BC : Orca Book Publishers, 2021.

Summary: Twelve-year-old Bea Gelman and her best friend Frankie are planning the BEST SUMMER EVER at Camp Shalom—a sleep-away camp. But at the last minute, Frankie bows out, leaving painfully shy Bea on her own. Just talking to strangers causes Bea to break out into ugly, blotchy hives. As if the hives weren't bad enough, Bea gets pranked by a couple of girls in her cabin and is betrayed by someone she thought was a new friend. Bea has had enough! She decides to spend her summer in the infirmary far away from everything that's stressing her out. No more boys (including her crush, Jeremy), no more horrible mean girls, and no more fake friends! At the infirmary, Bea meets Harry, a boy facing challenges way more intense than stress breakouts. Inspired by Harry's strength and positive outlook, Bea decides to face her fears—in a big way. This book is a funny and heartwarming account of a shy girl's first summer away from home, where she learns she really can do anything and that silver linings can be found just about anywhere.

The name I call myself

Vancouver, BC : Arsenal Pulp Press, 2020.

Summary: Meet Ari, a young person who doesn't like to be called by their birth name Edward: "When I think of the name Edward, I imagine old kings who snore a lot." Throughout this picture book, we watch Ari grow up before our very eyes as they navigate the ins and outs of their gender identity; we see how, as a child, they prefer dolls and princess movies, and want to grow out their hair, though their father insists on cutting it short, "because that's what boys look like." At nine, they play hockey but wish they could try on their mother's dresses; at fifteen, they shave their face, hoping to have smooth skin like girls. At sixteen, they want to run away, especially from their father who insists, "You're a boy, so you have to act like one." Who will Ari become? Moving from age six to adolescence, this book touchingly depicts Edward's tender, solitary gender journey to Ari: a new life distinguished and made meaningful by self-acceptance and unconditional love.

When life gives you mangos

London, UK : Pushkin Children's, 2020.

Summary: Twelve-year-old Clara lives on an island that visitors call exotic. But there's nothing exotic about it to Clara. She loves eating ripe mangos off the ground, running outside in the rain with her Papa during rainy season, and going to her secret hideout with Gaynah even though lately she's not acting like a best friend. The only thing out of the ordinary for Clara is that something happened to her memory that made her forget everything that happened last summer after a hurricane hit.

Incredible rescue mission

New York, NY : G. P. Putnam's Sons, 2021.

Summary: Omar is going on his biggest adventure yet—a trip to Pakistan. But his excitement about the trip is interrupted by some shocking news: his amazing teacher is not coming back to school, and no one will say why. When Omar and his friends start investigating, the hints they overhear and clues they find lead them to an alarming conclusion—it must be aliens. Omar has a huge imagination, but saving his teacher from aliens seems far-fetched even to him. He's going to need out-of-this-world creative thinking and a huge spirit of adventure to solve this mystery.

Unexpected super spy

New York, NY : G. P. Putnam's Sons, 2020.

Summary: Omar and his friends have been saving up their pocket money for ages so they can have the world's most epic Nerf Blaster battle. But when Omar discovers that his mosque is in trouble, they decide to donate their pennies to help save it. Then they try to raise some more money by: doing some chores (boorrring), selling some home-made cookies (deeeelicious) and holding a talent contest (YESSSSSSS). Everything goes PERFECTLY, until the money mysteriously goes missing. Can they work out who has taken it in time to stop the mosque closing down? And what exactly is Omar's sister Maryam hiding in her room?

Teaching history for justice : centering activism in students' study of the past

New York, NY : Teachers College Press, 2021.

Summary: Learn how to enact justice-oriented pedagogy and foster students' critical engagement in today's history classroom. Over the past two decades, various scholars have rightfully argued that we need to teach students to "think like a historian" or "think like a democratic citizen." In this book, the authors advocate for cultivating activist thinking in the history classroom.

Teachers can use this book to show students how activism was used in the past to seek justice, how past social movements connect to the present, and how democratic tools can be used to change society. The first section examines the theoretical and research foundation for “thinking like an activist” and outlines three related pedagogical concepts: social inquiry, critical multiculturalism, and transformative democratic citizenship. The second section presents vignettes based on the authors’ studies of elementary, middle, and high school history teachers who engage in justice-oriented teaching practices.

Have I ever told you Black lives matter

Thomaston, ME : Tilbury House Publishers, 2021.

Summary: Black lives matter. That message would be self-evident in a just world, but in this world and this America, all children need to hear it again and again, and not just to hear it but to feel and know it. This book affirms the message repeatedly, tenderly, with cumulative power and shared pride. Celebrating Black accomplishments in music, art, literature, journalism, politics, law, science, medicine, entertainment, and sports, the author summons a magnificent historical and contemporary context for honoring the fortitude of Black role models, women and men, who have achieved greatness despite the grinding political and social constraints on Black life.

They called us enemy [graphic novel]

San Diego, CA : Top Shelf Productions, 2019.

Summary: In 1942, at the order of President Franklin D. Roosevelt, every person of Japanese descent on the west coast was rounded up and shipped to one of ten "relocation centers," hundreds or thousands of miles from home, where they would be held for years under armed guard. This book is Takei's firsthand account of those years behind barbed wire, the joys and terrors of growing up under legalized racism, his mother's hard choices, his father's faith in democracy, and the way those experiences planted the seeds for his astonishing future. What is American? Who gets to decide? When the world is against you, what can one person do?

A mind spread out on the ground

Toronto, ON : Anchor Canada, 2019.

Summary: The Mohawk phrase for depression can be roughly translated to "a mind spread out on the ground." In this book, the author explores how apt a description that is for the ongoing effects of personal, intergenerational, and colonial traumas she and so many Native people have experienced. Elliott's deeply personal writing details a life spent between Indigenous and white communities, a divide reflected in her own family, and engages with such wide-ranging topics as race, parenthood, love, art, mental illness, poverty, sexual assault, gentrification, and representation. Throughout, she makes thrilling connections both large and small between the past and present, the personal and political.

Bridges over fences : from culture to culture

Place of publication : Publisher not identified, 2021.

Summary: This book presents a collection of stories about the early settlers of the Canadian prairies, and their interactions with the First Nations residents they encountered. These tales are snapshots of life in a time when the national plan to settle the land gave privilege and protection to the new immigrants, while relegating the first residents of the land to subjugation, subservience and poverty. In spite of these pressures, the common theme of these stories demonstrates that the natural tendency of human nature is to 'get along'. Through the voices of the storytellers, these tales illustrate a human dimension to the cross-cultural interactions that is down to earth, sometimes sobering and occasionally humorous. Tied to the government policies of the day through the accompanying story notes and appendices, these stories paint an evocative portrait of a vital and pivotal period in Western Canadian history. The intent of this collection is to show the reader that common human need and increased understanding can provide the impetus that helps break down barriers between cultures.

Legacy : trauma, story, and Indigenous healing

Toronto, ON : ECW Press, 2019.

Summary: Five hundred years of colonization have taken an incalculable toll on the Indigenous Peoples of the Americas: substance use disorders and shockingly high rates of depression, diabetes, and other chronic health conditions brought on by genocide and colonial control. With passionate logic and chillingly clear prose, the author uses history, human development, and her own and others' stories to trace the roots of Indigenous cultural dislocation and community breakdown in an original and provocative examination of the long-term effects of colonization. But all is not lost. The author also shows how we can come back from this with Indigenous ways of knowing lighting the way.

Women of the Métis nation

Saskatoon, SK : Gabriel Dumont Institute, 2019.

Summary: Métis Women are the heart and soul of the Métis people. Without them, there would be no Métis Nation. They are the strength behind our families, communities, and places of work. In the past, their kinship networks established where people settled and whom people married.

Sovereign within their familial and community roles, they were the healers, the stewards of the land and its resources, the keepers of Indigenous knowledge, and the midwives who kept the Métis Nation nurtured, educated, and sustained. This tradition has continued into the present as Métis women have moved past their domestic and familial spheres into areas such as social advocacy, the arts, sports, law, post-secondary education, and entrepreneurship. Containing hundreds of biographies, this book is an ambitious role model book that documents more than 200 years of trailblazing Métis women.

Summary: Dans cet ouvrage, l'auteure met en évidence le lien entre l'esprit et le corps et son impact sur l'apprentissage. Plus précisément, elle explore les filiations qui existent entre le côté du corps favorisé pour voir, entendre, toucher ou bouger et la façon de réfléchir, penser, apprendre et travailler. À partir de ses recherches, elle identifie jusqu'à 32 profils dominants qui déterminent le style d'apprentissage de chacun. Ces profils apportent une connaissance de soi qui aide à voir ses forces et ses faiblesses avec plus de flexibilité tout en raffermissant la confiance en son propre potentiel.

La gestion des comportements en classe : et si on regardait ça autrement?

Montreal, QC : Chenelière Éducation, 2009.

Summary: Cet ouvrage est une invitation à sortir de l'impasse dans laquelle nous sommes actuellement à propos de la gestion des comportements des élèves. L'auteure propose d'abord de revoir huit croyances qui orientent nos actions pour ensuite faire le point sur le comportement. Qu'est-ce qui motive les êtres humains? Pourquoi l'utilisation des menaces ou des récompenses n'entraîne-t-elle pas davantage de motivation? Comment fonctionne le comportement? Elle propose ensuite à l'enseignant de faire de son groupe d'élèves une communauté démocratique structurée, qui posséderait ses principes, ses rôles, ses règles et ses comportements. Elle suggère des moyens concrets d'engager les élèves dans un véritable groupe d'apprentissage, où chaque membre exercerait sa liberté dans les limites des indispensables règles de vie collective qu'il aurait contribué à mettre en place. Dans un style direct et plein d'humour, Sylvie Dubé atteint le but qu'elle s'est fixé : elle amène sans contredit l'enseignant à regarder autrement son comportement et ses pratiques de gestion de classe et à évaluer ce qu'il pourrait modifier pour responsabiliser davantage ses élèves et ainsi jouir d'une qualité de vie plus satisfaisante en classe.

Lire et écrire au secondaire : un défi signifiant

Montréal, QC : Chenelière Éducation, 2005.

Summary: Le changement suscite souvent appréhension et méfiance chez les enseignants. Or, le monde de l'éducation est en pleine mouvance : d'ambitieux programmes de formation voient le jour et proposent des approches et des exigences nouvelles, un vocabulaire différent, etc. Dans la classe de français, langue d'enseignement, comment s'y retrouver ? Que faut-il retenir ? Surtout, comment relever le défi du changement pour qu'il soit signifiant ? À l'ère de l'approche par compétences et de la réforme de l'enseignement au secondaire, Lire et écrire au secondaire se veut un guide pratique et une invitation au plaisir, celui d'enseigner et celui d'apprendre. Léonard de Vinci

Montréal, QC : Petit homme, 2013.

Summary: Collection de documentaires de petit format dont chaque titre propose l'exploration d'un sujet lié à un grand domaine de la connaissance: la nature, l'histoire, le monde, les sciences. Les notions documentaires, limpides et concises, sont distribuées en une dizaine de doubles pages thématiques parmi lesquelles un index et une table des matières facilitent la navigation. Un glossaire (dont les termes définis ne sont malheureusement pas indiqués dans le texte) ainsi qu'un petit jeu éducatif complètent la plaquette. Sous ce titre: schémas et panoramas légendés et encarts informatifs s'allient afin de faire découvrir aux lecteurs le génie de Léonard de Vinci, dont on découvre les machines de guerre, les travaux réalisés sur l'anatomie, les engins volants, les études portant sur la perspective et la proportion ou encore les tableaux emblématiques que sont la Cène et la Joconde. Un regard sur la jeunesse et l'apprentissage de l'homme ouvrent le tout.
