Owning up : empowering adolescents to create cultures of dignity and confront social cruelty and injustice

Thousand Oaks, CA : Corwin, 2021.

Subjects: Adolescent psychology. Teenagers—Attitudes. Teenagers—Conduct of life. Teenagers—Life skills guides.

Summary: This book provides a structured program for teaching students to own up and take responsibility as perpetrators, bystanders, and targets for unethical behavior. The curriculum is designed for adolescent groups (Grades 6-9) in schools and other settings and can be used in co-educational groups as well as with girls and boys separately. It presents a unique and comprehensive approach to preventing youth violence by targeting the root causes of bullying and other forms of social cruelty. It exposes the cultural expectations that teach young people to humiliate and dehumanize others as the way to achieve power and respect, then challenges them to transform this dynamic. The program also addresses the nuanced ways in which racism, classism, and homophobia are expressed in our culture and affect social cruelty and violence. Sessions combine group discussions, games, role-playing, and other activities to engage students in understanding the complexities of adolescent social culture. Students learn to recognize that they have a responsibility to treat themselves and others with dignity and to speak out against social cruelty and injustice.

What type of person am I?: personality and careers [DVD]

Mount Kisco, NY : Human Relations Media, 2007.

Subjects: Educational films. Personality and occupation. Vocational guidance.

Summary: Based on research showing personality type as the key factor in successful career development, this program helps young teens understand the six basic personality types as presented in the Holland Hexagon: Doer, Thinker, Creator, Helper, Persuader and Organizer. Teens begin to identify their interests and abilities, and see how their own personalities fit with the general types and connect to potential careers. Using real teen scenarios, viewers will learn how to identify what they're good at doing, what their interests are, and how to translate this information into career choices. Students are reassured that all the personality types are equally worthwhile and only one of several factors affecting career satisfaction.

Culturally responsive pedagogy : promising practices for African American male students

Charlotte, NC : Information Age Publishing, Inc., 2020.

Subjects: Achievement motivation in children. African American boys—Education. Culturally relevant pedagogy. Education, Elementary—Evaluation. Educational equalization.

Summary: As an African American educator, I have been able to see how the lack of culturally responsive practices creates learning obstacles for African American male students. These learning obstacles continue to plague a group that has been historically marginalized in our society. The implementation of CRP practices provides educators with an avenue to remedy a social justice issue that has plagued America for years. The information shared in this book can

be beneficial for all those invested in closing the achievement gap and increasing student learning outcomes through the use of culturally responsive practices, including pre-service and in-service teachers, administrators, caregivers, community advocates, educational researchers, and policy makers.

Teaching for transfer : a guide for designing learning with real-world application

Bloomington, IN : Solution Tree Press, 2021.

Subjects: Career education. Education—Aims and objectives. Effective teaching. School-to-work transition. Transfer of training.

Summary: In this book, the author provides a guide that educators can use to improve their teaching, engage their students, and develop their students' transfer abilities. McDowell notes that teachers want students to meet transfer goals and become proficient in transfer. However, creating a classroom and curriculum that develops students' transfer abilities is a daunting task. As such, this book answers the how and the why of teaching for transfer. Readers will become familiar with transfer and study the foundational concepts and theories of teaching for transfer. Using this foundational background, they will also be provided with an in-depth, concrete guide to the styles of teaching that are necessary to effectively develop students' transfer abilities. This book has all the information and actionable strategies needed to develop a system of teaching that enables all students to hit their transfer goals.

Nicotine, vaping and the developing brain [DVD]

Mount Kisco, NY : Human Relations Media, 2019.

Subjects: Cigarettes—Toxicology. Educational films. Electronic cigarettes. Nicotine—Physiological effect. Vaping.

Summary: The use of vaping devices such as JUUL has reached epidemic proportions among adolescents and even preteens. Many young people are unaware that most e-cigarettes contain nicotine, a highly addictive chemical that can harm brain development. In this program, diverse adolescents describe how they became addicted to nicotine as a result of vaping. A neuroscientist and physician explain how nicotine changes the still developing adolescent brain and can harm the parts of the brain that control attention, learning, mood, and impulse control. Viewers learn that changes in the brain resulting from nicotine also make the brain more susceptible to addiction to other substances and that young people who use e-cigarettes are more likely to smoke tobacco cigarettes in the future.

Rock paper fish [DVD]

Place of publication: Wild Confluence Media, 2019.

Subjects: Alaska—Gold discoveries. Ecology. Gold mines and mining. Nature conservation.

Summary: Journey deep into the rainforest of southeast Alaska, where life is inseparable from the age-old rhythms of the Chilkat River. Every year, all five species of salmon return to the Chilkat, drawing the world's largest gathering of bald eagles, insatiable grizzly bears, and fascinated tourists. The salmon also define life for two communities: The ancient Tlingit village of Klukwan and the scrappy commercial fishing town, Haines. Meanwhile, a modern-day gold rush is under way. Helicopters fly between cliff-side drill pads as Constantine Metal Resources races

to explore the potential of a hard-rock mine. Downstream in Haines and Klukwan, some locals are eager for a mining boom, while others fear that the risks to the Chilkat Watershed far outweigh short-term economic benefits. The prospect of a mine has deeply divided the communities, and left them struggling to keep pace with the agenda of multinational corporations. This DVD offers a vivid look into the lives of Alaskans grappling with questions as immense as the place they call home.
